

"You don't rise to the level of your goals. You fall to the level of your training."

— Team Incline

HOW TO USE THIS PLAN

- Always complete the warm-up before the first working set and the cool-down after your last.
- Form first — add load only when every rep of the last set is clean.
- Rest times are guidelines; take longer on heavy compound lifts if needed.
- Log your sets, reps and load each session so progression stays measurable.

DO

- 5–10 min dynamic warm-up before every session
- Hydrate — sip water between every set
- Log every set: weight, reps, RIR
- Sleep 7–8 hrs for recovery & growth
- Progressive overload weekly (weight or reps)
- Ask your trainer if form feels off

DON'T

- ✗ Skip the warm-up to "save time"
- ✗ Ego-lift — form first, weight second
- ✗ Train through sharp / joint pain
- ✗ Hold your breath under heavy loads
- ✗ Compare your day-1 to someone's year-3
- ✗ Skip rest days — recovery is when you grow

PRO TIPS

- 1 Form > weight. Always.
- 2 Track sessions in an app or notebook.
- 3 Deload every 4–6 weeks to recover.

INCLINE
